

4 January 1967

MEMORANDUM FOR: Assistant Deputy Director for Intelligence

SUBJECT: Cartographer [REDACTED] 25X1A6a

25X1A6a

1. The map reference - cartographic function [REDACTED] appears to be at a critical stage. There are major changes evolving as the Revolutionary Development Program solidifies and CIA's role in it is determined. However, certain basic factors can be used at this time to determine a policy concerning DDI's role in providing the subject support.

2. [REDACTED] was able to set up a minimum map reference service [REDACTED]. Also, he was able to determine some of the cartographic-graphic support needs of the Agency [REDACTED] and in the field. At a minimum, the reference service must be constantly maintained as it quickly disappears. Cartographic-graphic support is a crying need and is a two-way street. [REDACTED] needs cartographic support from Headquarters and the Cartography Division, OBI, needs basic source materials [REDACTED]

3. To best accomplish these goals with minimum expenditure of time and money, it is recommended that one of the Collation Branch slots be filled by an OBI type on a PCS basis. The person selected would have a combined capability in map reference and cartographic skills. On an interim basis, it is recommended that [REDACTED] (CD/F) spend 3 weeks [REDACTED] while on a TDY to the Far East. He plans to depart Washington in late January and would arrive [REDACTED] in early February. It will be possible for him to maintain the work started [REDACTED] and pass it on to the PCS-type to be assigned later. It is further recommended that this plan be discussed with [REDACTED] while he is at Headquarters.
